Description:

A necromancers beast. A heros vengeance. In a world of lost kingdoms and power-hungry empires, those left behind must learn to pick up the pieces.

Okay, wow! Jaeths Eye is about a bunch of people in a turbulent world with some supernatural/magical things that are threatening to undo everyone. Let me try that again. This book is about Kefier as he struggles to reconcile his past and find his way in life. Or its about Sumes struggle to care for her family and the sacrifices she makes to achieve that goal. Or maybe its about Ylir, a man with something to prove to his master and everyone else hes so desperate to manipulate. The thing is, theres no clear hero in this story. Dont get me wrong, I dont mind this, but there were so many jumps, and the point of view character wasnt always readily apparent - sometimes you just had to guess based on the info. Which got a bit irritating. The other problem I had with the story was all the cliffhangers and missing information. Im still not certain how Kefiers partner, Oji, died. I have some idea, but its not entirely clear. Which may be because theres more story to tell. But by about halfway through the book and the numerous cliffhangers with no idea where the book was going or how it would get there, I got frustrated. Those nits aside, the world the author created is phenomenal. Its so well thought-out, it could be another planet or an alternate history. There are people and their different gods and customs and speech and rivalries. And the story - what of it I could gather - was rather entrancing. I bled for those characters, so broken, each with their own misery to tell and their own paths to forge. And some of the reveals were out of this world. The story is so drip-fed, that I didnt make many of the connections that the end pointed out. So if you like experimental narratives, fully formed worlds that will transport you, and a steady stream of cliff-hangers (or some might call it intrigue), then pick up Jaeths Eye. :)
